INTERNSHIP EXPERIENCE

IBM Mooc – Artificial Intelligence Intern (Virtual) — **Jun 2026 – Aug 2026**

- Developed a content-based course recommendation engine using TF-IDF vectorization and cosine similarity to rank courses based on skills, descriptions, and tags.
- Built and deployed a responsive Streamlit application with dynamic course search, category browsing, and personalized recommendations.

PROJECTS

AskMyDocs AI – Production RAG System | *Python, FastAPI, ChromaDB, LLMs* — **Aug 2026**

- Built an end-to-end Retrieval Augmented Generation (RAG) application allowing users to upload PDFs and ask contextual questions.
- Implemented hybrid retrieval using semantic vector search, BM25 retrieval, and reranking for improved answer quality.

Scalable E-Commerce Backend | *MongoDB, Express.js, Node.js, REST APIs* — **Jul 2025**

- Developed a full-stack e-commerce application using the MERN stack, implementing product browsing, shopping cart management, checkout, and order tracking.
- Implemented secure authentication using JWT, bcrypt password hashing, and role-based access control; integrated Razorpay payments and Nodemailer email notifications.
- Built RESTful APIs and an admin dashboard for product and order management, integrated Multer with Cloudinary for image uploads, tested APIs using Postman, and deployed the application on Render.

Movie Recommendation System | *Python, Scikit-learn, Streamlit* — **May 2025**
